Thousand Men in Manitoba.

Winnipeg, Dec. 14, 1901.

Three hundred members of the peace
association were brutally flogged by
DeWet and one British subject was
killed.

London, Jan. 14. A special despatch
from Pretoria, dated Jan. 11th, and
concerning the fight on Jan. 9th, near
Kamatseng, says that DeWet, the
leader of the "Gat," Howard's scouts,
were composed of Canadians,
the remainder in South Africa and re-
gimented. These forces harassed the
retreating Boers a distance of five miles
from the scene of the fight. One of De-
wet's scouts with a rifle and a box of
ammunition's papers strapped to
his back and 500 cattle were also cap-
tured.

London, Jan. 13. The war office re-
ceived the following despatch from
General Buller: Pretoria, Sunday,
Jan. 13. A force of 1,400 Boers crossed
the line at Kamek, both Zevenfontein
and Kamek stations, but were
driven off. They are being pursued by
several brigades.

Winnipeg, Jan. 14. There is
strong movement among military
men at present citizens here in-
cluding High John Macdonald, to have
government consent to allow Mani-
toba to supply the thousand men
needed for the Baden-Powell police
line. Mr. Macdonald when speaking
of over correspondence said that
Manitoba could supply five such forces
without difficulty, as the very best
in Canada were available. With-
out any advertising whatever Major
Kilmer, D. C. B., has received over
one hundred letters from all over the
country desiring to enlist. Any number
of letters are also available and it is
stated here by military men that the
government is not adverse to the plan.

TESTING THE VITALITY OF SEED.

The following communication from Wm. Saunders, director of experimental farms, is of special interest to the farming community of Alberta:

Editor Bulletin.

The past season has in certain localities been unfavorable for the perfect maturing of grain. In some districts it has been injured by rain during harvest or from being stacked before fully dry, thus causing it to rot or heat, while in other localities it has suffered more or less from early autumn frost. When exposed to either of these conditions cereals are apt to lose a portion of their vitality or to have it so weakened as to produce when sown an unsatisfactory growth. The character of the crop is greatly influenced by the quality of seed used, and to obtain the best results it should have its germinating power unimpaired, so that when placed in the soil the young plants may make a prompt and vigorous start. Hence it is very important that farmers should ascertain whether the grain they are holding for seed possesses the vitality necessary to produce a good crop.

By instruction of the honorable minister of agriculture, provision has been made whereby the vitality of seed can be ascertained without cost to the individual, and any farmer in the Dominion, who may have any varieties which he desires to have tested can get the information he needs, by forwarding to the director of the experimental farms, Ottawa, samples of such grain or seeds. Samples may be sent free through the mail and an ounce or two is sufficient for the purpose. About two weeks are required to complete a test. It is hoped that all who desire to avail themselves of the provision offered will send in their samples early so that the work may be completed in good season.

Ottawa, Dec. 26, 1900.

SMALL POX DANGER.

The provincial health department authorities here reports that there are grave fears entertained of an epidemic of small pox in Manitoba, unless the utmost precautions are taken not only by medical officers, but by the masses of the people in the way of vaccination and good sanitary arrangements.

Reports received at the department from the medical officers at Regina, Altona, Emerson, Killarney and other places near the Dakota boundary, indicate that small pox is very prevalent south of the line and evidence received from these reports, several deaths are reported near Rollo, N. D., and the plague is said to be on the increase.

Mr. Wood, secretary of the health department, states that unless the utmost precautions are taken the disease will be next spring, and everybody who has not recently been vaccinated is strongly advised to do so. All the officers of the health department have been warned of the condition of affairs and are on the alert. A new supply of vaccine points has been secured and the same will be distributed free of charge upon application.

LABOR PLATFORM.

Following is the platform adopted by the Nelson convention of the independent labor party of British Columbia, on which candidate Chris. Foley squares stands:

1. Free compulsory education.
2. Legal working day of eight hours.
3. Government inspection of all industries.
4. Abolition of contract system on all public works.
5. Public ownership of all franchises.
6. Prohibition of Asiatic immigration and the regulation of all immigration by an educational test as to immigrant's fitness, and the abolition of all special inducements and privileges to foreign immigrants to settle in the Dominion.
7. Abolition of child labor under 12.
8. Abolition of the \$250 deposit required of all candidates for the Dominion house.
9. Compulsory arbitration of all labor disputes.
10. Prohibition of prison labor in competition with free labor.
11. All election days to be made public holidays.
12. Abolition of Dominion senate.

ABOUT ALBERTA CATTLE.

Commercial: Mr. F. Stimson, manager of the Northwest Cattle Co., writes Montreal this week. To the Gazette he made some very satisfactory statements regarding the condition of affairs in the territory of Alberta. Last winter was so favorable that the cattle came out in a very fine condition, and in fact there was good green grass in the month of April. Shipping to England began in July, which was fully one month earlier than ever before. No less than 10,000 head were shipped during the month of July while 20,000 more went out the two following months.

"What did the cattle that were sent to England bring?"

"The best steers," Mr. Stimson replied, "brought \$45 while \$25 was the price for spayed heifers." The weight of the steers alive would average 1,500 lbs. Besides these shipments Alberta probably sent 50,000 head to British Columbia and the Klondike,

the quality of cattle going to the Yukon being of the very best. Referring to this trade, Mr. Stimson said that while Messrs. Gordon & Ironsides did all the export business, the western trade was absolutely in the hands of Mr. Pat Burns. He has large abattoirs at Calgary, where he has room for 2,000 head of cattle, 1,000 hogs and 25,000 sheep. During the year 15,000 stockmen have been brought into Alberta from Manitoba and Ontario, and there are probably as many as 200,000 head now wintering in the territory. Mr. Burns is feeding about 10,000 beef cattle, out of which he takes a monthly draft of about seven hundred for his trade.

"What about the horse trade in Alberta?" Mr. Stimson was asked.

"The horse trade has been good this year. All the horses for the second contingent and the 'Strathcona' were taken from Alberta, and, as they were amongst the best sent to South Africa we find it a little surprising that the authorities did not come to us for more, as there were a large number of horses in the country suitable for this purpose."

Speaking of the condition of things generally, Mr. Stimson said the country was in a prosperous condition. Large numbers of immigrants from the United States are coming into Northern Alberta, which is particularly well adapted to stock raising and mixed farming. These settlers are a very superior class of people, having a good deal of money, many being Canadians who left the Dominion years ago, and who are now returning to settle down in the Northwest.

THE NEW POLICEMAN.

Such radical changes are being made in the uniform of the mounted police that the policeman of 1900 will hardly recognize his brother-in-arms of 1901. The organization of the force remains unchanged but its outward and visible sign was altered on the first of January. The new uniform has not yet been issued, but will be sent out shortly, according to an order in council passed at Ottawa, a few weeks ago. The long black riding boots are to give place to brown faced ones, similar to those issued to the Strathcona Horse. Brown gaiters and gloves also take the place of the present white ones; and the consequent abolition of the necessity for starch and pine clay will cause no regrets in the hearts of "the riders of the plains." The red serge will be supplanted by a less conspicuous and more serviceable blue one. The red tunic remains as part of the dress uniform, but has some alterations in pockets and other changes making it more suitable for general service. The "gill box" and the white helmet for state occasions are done away with, two other abolitions which are not likely to cause acute grief in the barracks. The new blue hats are the Stetson and military service cap for summer wear, and in the winter a new fur cap, which was first issued to the men in the Yukon where its usefulness was demonstrated. The service cap is similar to that worn by officers with andrew uniform. Mercenaries are done away with and felt boots substituted. The effect of the various changes is to make the uniform a little less military and a great deal more useful.

CANADIAN LLOYDS.

From the Commercial: Montreal will next season have a new insurance company which will obviate the necessity of vessels leaving the port of Montreal without any insurance upon their cargoes, as was the case in several instances during the past season. The name of the new insurance company is the St. Lawrence Lloyds, and its aim, as set forth in its notice of application, is to carry on an ocean and inland marine insurance business with the right to maintain and navigate ice-breaking and wreck-relieving steamers on the St. Lawrence river. Mr. Louis Royer, solicitor of Dandurand, and Bordere & Royer, Montreal, is the applicant.

The company will be formed of several well known Montreal capitalists whose names are not yet divulged. The company proposes to insure Canadian shipping at lower rates than those at present prevailing, so as to enable all vessels leaving port in the fall to get insured. Several of the vessels which left Montreal late last fall had to proceed to sea without any insurance, as the underwriters would not take the risk.

The company will maintain a fleet of ice-breaking steamers to enable their insured vessels to move safely leave port in the autumn. These will probably be on the lines of the Duluth ice boats, of the Inman type, whose owner was in Montreal some weeks ago. The new company will be ready for business next season.

The formation of this Canadian Lloyds is the most important step taken along the lines of building up of the St. Lawrence route for many years, as it will tend to destroy the present high rate controlled and imposed by the English company. The formation of this company has additional significance from the statement made by Mr. Blair, minister of railroads, at the recent banquet to Mr. Hayes at Montreal, when he said, amidst loud cheers, that no English insurance monopoly could hinder the progress of the St. Lawrence route. The backbone of the company is the Clergue syndicate of St. St. Marie, who with Montreal capitalists, form the company. The capital is \$5,000,000.
